DECONYX™
TRANSLUCENT SHINE PANELS

Be Indian Buy Indian

First manufacturing unit to produce Exterior and Interior Grade, upgraded alabaster. As it is a non-breakable, used for Exteriors and Interiors,
We can apply in huge quantity in any concept.

The best Characteristics of alabaster is that it can transmit light and has various styles and designs, It looks natural with good feel effect and is easy to install. It has advantage of being bent and has seamless joint property too. "Deconyx" is the only company in the world to produce exterior grade alabaster. Colourful architectural surface in Rustic finish is always the like of architects and we give our best to fulfil their needs. The elegance, design and quality really express the beauty of "Deconyx" material. Our upgraded technology and techniques offer visual perfection and easy in installation material for exterior and interior surface beautification. Transportation problem has no place in "Deconyx".

"Deconyx" has a dream to provide unique and monopoly products. A lot of new products are in pipeline. Quality and service are both hands of "Deconyx".

COVERING NEW ENVIRONMENTS, WITH LAST GENERATION MATERIALS BEYOND YOUR DREAMS.

Features:

- Backlit Application
- Aesthetic
- Natural Look
- Highly Chemical Resistant
- Available in many Designs
- Approx Size 8'x4' & 8'x2'
- A Versatile, Robust & Hygienic Surface.
- High Resistance to External Stress (Abrasion, Impacts, Stains etc.)
- Non Porous, Waterproof Surface.

Applications:

- Hotel
- Resort
- Restaurant
- Bar
- Cafeteria
- Club house
- Banquet hall
- Mall
- Multiplex
- Showroom
- Corporate office
- Spa
- Beauty salon
- Gazebo

DECONYX™
TRANSLUCENT SHINE PANELS

DECONYX is made by high molecular polyester resin. It looks like a natural stone and is not as expensive as them. It is easy to operate which makes it extremely popular worldwide. The best characteristics of DECONYX is that it can transmit light and has various styles and design to choose from. It has the advantages of being bend , seamless joint process and is non breakable

Specifications of DECONYX
Standard size: 4' x 8' (Approx) AR Series: 2' x 8' (Approx)
Thickness: 4mm, 5mm, 7-8mm (Depending on Series & Pattern)

Range of application:
Decorative wall panel, bar top, table top, light-through structure, translucent walls, ceilings, bar tables, lamps, columns of commercial buildings and household decoration purpose.

Performance of Landscape stone products:
Possessing the natural texture of marbles, smoothness of ceramics and the elasticity of lumber, Deconyx Series could be processed without joints. Besides, they offer many designs to choose and are easy to clean and convenient to fix. Scientific tests verify that Deconyx series have neither radioactive pollution nor toxic side effects. So far, these environmental friendly stones have been widely applied into various kinds of decoration projects.

Process and installation of Landscape stone products:
Easy to fabricate & install. Can fabricate on the spot. Wood-cutting saw or marble-cutting saw for cutting, hand drill machine for hole-drilling, router machine for edge chamfering & bending by heat.

The Photographs just show the partial effect. Its colour, effect and veins are not absolutely the same. Please see the samples for original colour & effect to avoid confusions. All designs are random.
Colour Variations upto 5-10% is possible as per different batch of production.

Thickness: 4mm, 5mm & 7-8mm

Recommended Glue for Joints: Resibond Clear
Araldite Clear
Silicone Clear

Recommended Glue for Pasting: Resibond
Araldite
Bondtite

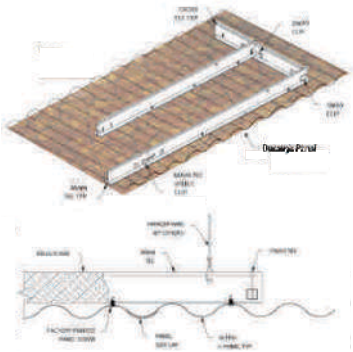
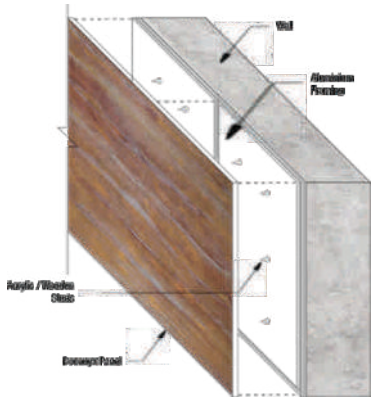
Panel Installation Guide

Ceilings



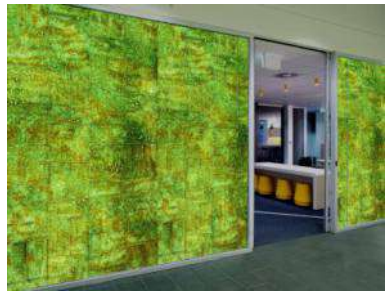
Deconyx panels supported with wooden frame structure

Wall Cladding / Column / Beam



Furniture

Deconyx panels can be used for direct furniture installation using silicon binder with backlit applications.



Back Light Panels

Allow backspace of 2.5 to 3 inches between the Deconyx sheet & Light panel. Amount of space behind the sheet may vary with different types of light and its application.

Safety Precautions & Care :

- Cut sheets in open area to avoid itching on body.
- After Cutting, Wash the sheets with water and Brush.
- Always wear Mask & Gloves while handling & installing the panels
- Keep sheets covered during any chemical application at site.
- For any kind of spot, clean with white cloth and ACETONE (Spirit).

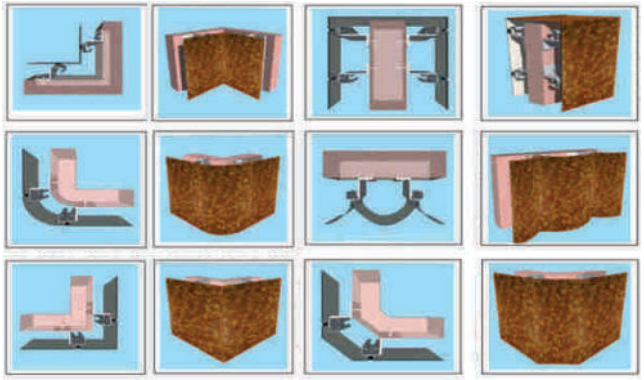
Note : Slight Variations in Colours and Patterns gives natural look. We need to accept it practically .

Panel Installation Guide

DECONYX™
TRANSLUCENT SHINE PANELS

Exterior Cladding

Exterior wall panels cladding with aluminium framing and backlit installation



Sheet Bending Process

- Apply heat on both sides for easy bending
- Chamfering is a better and easy option for 90^{o} attachment

Apply transparent silicone to
Join both pieces.

Flooring

Deconyx panels installation with silicon binding
