INTRODUCTION

It is the infrastructure that decides the quality of the products. SHREE TIRUPATI BRASS WARE incorporates state-of-the-art infrastructure to facilitate manufacturing of high quality products. Our manufacturing unit is spread in an area of around 5,000 Sq. Yard and is equipped with state-of-art hardware manufacturing machines. Backed by a team of experienced professionals, technical staff and skilled manpower, we try to deliver best output to our customer, in terms of product quality and innovative designs.

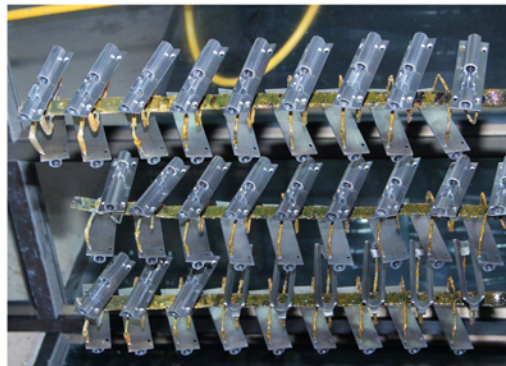

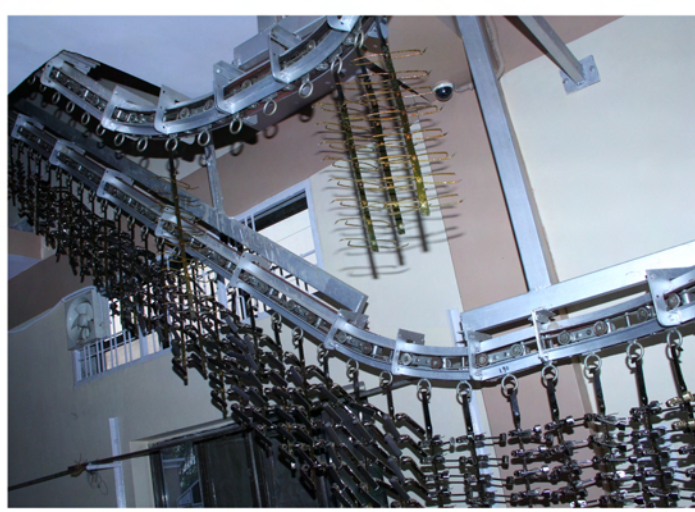

SHREE TIRUPATI BRASS WARE was emerged as a leading name in the manufacturing and supply of high-quality builder hardware products and accessories. We manufacture a wide range of hardware fittings of doors, windows, cabinet, bathroom, curtain fitting and many more items in ferrous and non-ferrous materials like brass, steel etc.

Established in the year 1980 in Aligarh, our company produces the complete range of Architectural Fittings under the brand name 'AKANKSHA'. Designed and developed by a team of highly experienced designers, these architectural fittings will alter the looks of your homes and offices. We are focused on providing the best product range at a very cost-effective price.

Our mission is to provide total customer satisfaction, and increase our market share in the Architectural Fittings and Hardware segment. we continuously introduce new product designs and offer high-quality products to our clients while adhering to the committed delivery schedules. Exclusive range along with competitive price range is our core strength.

DIRECTOR

We at SHREE TIRUPATI BRASS WARE have one of the finest production facility of Brass Hardware in the region.

Our entire Brass Hardware Product Range is forged from virgin brass is our state of the art fully computerized production facility. Various polished finishes are achieved in our most modernized electroplating plants. To enhance the life of the finished surface PU coating is done as a top coat using fully computerized sensor controlled spray guns

To further improve the strength of the PU coat, the finished piece is baked using ultraviolet radiation through baking conveyerised oven process in a fully automatic plant. The entire process, is controlled by a highly skilled team of engineers and technicians who have been imparted training and know-how at the top production facilities in the world.

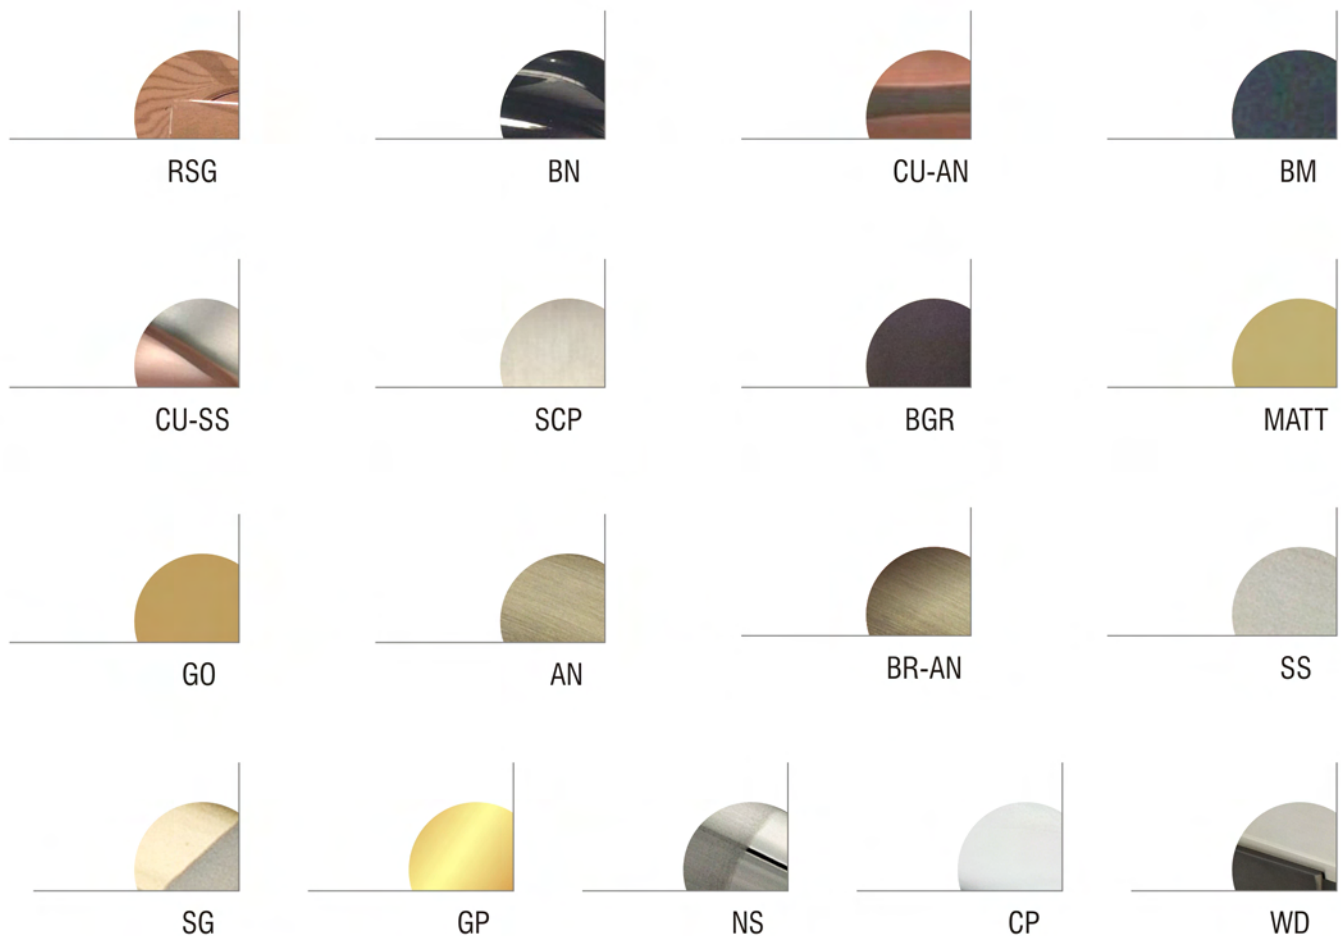

QUALITY POLICY

Our unbeatable product quality comes with years of devotion and dedication. The vast client base certifies the quality of our products, Right from manufacturing to packaging, our approach is customer-centric. We have a devoted and dedicated team of quality professionals involved in steady innovation. The purpose of our quality system is to reduce, eliminate and most importantly prevent deficiencies in our products and services.

NEW PRODUCT DEVELOPMENT

Our in-house design & development unit and research & development unit are continuously involved in conceptualizing new ideas and styles for every product range. These facilities also help us to create innovative designs and manufacture customized products.
