**RECHARGEABLE MOSQUITO BAT**

Protect your loved ones from dengue & malaria

# About Us

Making a humble beginning with electrical business in 1971, we were leaders in the distribution of electrical goods, both wholesale and retail. In 2013 we ventured into electrical import business. We created a brand named WIN FORCE and marketed mosquito bats. We imported mosquito bats and distributed them in the Indian market through our far-reaching distribution network.

Since we were not satisfied with the quality of the imported products, which did not meet the Indian standard, we started our own manufacturing unit in 2018. Now, we have our own manufacturing unit which manufactures high-quality mosquito bats which benefit the international standard. We have the latest imported manufacturing machines in our manufacturing unit. We use the best grade materials. A strong and wide network of distributors makes it possible for us to take our mosquito bats throughout India.

Our products are very much sought after for their shock-proof net, light weight, portable, easy-to-maintain, safe-to-operate, user-friendly and environmental-friendly nature. A lasting, rechargeable battery is an additional boon to our mosquito bat. Our rates are reasonable and the bat is accessible and within reach even to an ordinary man.

## Features

- ◆ This rechargeable type unit can be recharged for more than 500 times.
- ◆ Two speed discharge: It adopts an innovative two speed discharge circuit which can output 3000V in a moment which kills mosquitoes and insects instantly.
- ◆ Electric shockproof net: It consists of a special 5-layer net which easily catches insects and never allows them to escape.
- ◆ Eco-friendly product: Has no chemicals. Does not emit smoke.
- ◆ Safeguard for your family from dangerous dengue and malaria-causing mosquitoes.
- ◆ No hazard for your infants.
