Crompton reserves the right to change the specifications without notice in the interest of technological progress. While every effort has been made to ensure that all specifications and descriptions are correct at the time of going to press, this catalogue should not be regarded as an infallible guide for a particular product. Due to variations in the reproduction process, the colours of products may vary slightly from those depicted. We recommend visiting a Crompton brand store to confirm that specifications and colours are to your satisfaction. All rights reserved. No part of this publication may be reproduced in any form by any means without the permission of Crompton Greaves Consumer Electricals Limited.

At Crompton, we make your life better with innovative, sustainable solutions.

At Crompton, we create sustainable value for all stakeholders with a long-term perspective. We realise this purpose by being greener and smarter in our operations and delighting our consumers through products that add tangible value to their day-to-day lives.

Having begun the journey in the pre-independence era, we have nurtured a rich legacy down the decades that followed. In 2015, the consumer business of the Company was demerged to form a separate entity, 'Crompton Greaves Consumer Electricals Ltd.' ("CGCEL").

Over the years CGCEL has earned the trust and goodwill of all investors and stakeholders. Our brand reputation and recall are enhanced by our ability to address the aspirations of everyone by prioritising innovation, sustainability and inclusivity in the ways we operate.

Innovative

Embedding innovation in day-to-day business is a round-the-year priority at Crompton. It revolves around energy efficiency, healthy living, IoT and smart connectivity and above all customer-centric design. We will continue to introduce and strengthen 4.0 industry technologies and practices to revolutionise our product lines and adhere to global standards in operations to benefit our consumers and all stakeholders.

Sustainable

Our Sustainability Plan is aligned to the United Nations Sustainability Development Goals (SDGs), enabling us to step up our initiatives and investments to fulfil Environmental, Social and Governance (“ESG”) priorities. These include reducing energy and water consumption, investing in renewable energy sources and supporting local communities.

Our marketing and labelling efforts equip our consumers with a better understanding of the energy efficiency aspects of Crompton products. We have successfully launched energy-efficient products in all our product categories.

Inclusive

Value creation, for us at Crompton, is all-encompassing, touching lives across the socio-economic spectrum. Our Corporate Social Responsibility (“CSR”) programme, aligns with Crompton’s long-term commitment to build positive and shared value for all.

Our CSR initiatives focus on the following key areas: skill & entrepreneurship development, employee engagement, water conservation and community care.

Know more about **Crompton**

From the pre-independence era to the 21st century, Compton has transformed in step with changing times and evolving consumer aspirations. Today, Compton Greaves Consumer Electricals Limited (CGCEL) is among India's leading consumer electrical companies present in the Electrical Consumer Durables (ECD) and Lighting segments.

Over the decades, we have embraced advanced technologies and implemented best-in-class processes. Headquartered in Mumbai, we have made our mark in the technologically advanced ECD industry in India. Crompton's emphasis continues to be on innovation to bring to the market a wide range of products that our brand patrons love to embrace for their elegance, convenience, simplicity and low power consumption. From LED lights, fans, pumps to household appliances such as water heaters, kitchen appliances, our products span a diverse range, catering to the growing consumer preference for smart, intelligent and connected products.

Crompton's strategically located manufacturing facilities, R&D and quality assurance certifications, brand reputation and recall, along with wide distribution network enable us to fulfil dynamic consumer aspirations in a sustainable manner.

The unique strength of our Company lies in its promoter-less structure and the emphasis on a professionally driven board. As an employee-run Company, we prioritise collective decision-making, fostering a culture of inclusivity and shared responsibility.

Our Board comprises of experienced professionals from diverse backgrounds, ensuring a wide range of perspectives and expertise in strategic decision-making. With the Board at the helm, all decisions are made through a rigorous and impartial process, guided by the best interests of the Company and its stakeholders.

This structure fosters a strong sense of ownership and commitment among employees, driving their dedication to the Company's success.

By empowering employees to actively participate in decision-making, we harness the collective intelligence and creativity of our workforce. This employee-driven approach fosters a culture of innovation, adaptability and continuous improvement, enabling us to stay at the forefront of our industry.

As we move forward, our current structure will continue to be a key differentiator, enabling us to adapt swiftly to changing market dynamics, seize new opportunities and navigate challenges with agility and resilience.

Our mission

We strive to create products that are safe, energy-efficient, dependable and environmentally friendly by constantly improving our core technology.

Our purpose

- We make your life better with innovative sustainable solutions
- Promising a sustainable future by catalysing change
- Breaking the barriers, reaching beyond profit maximisation

Crompton Built-in Kitchen Appliances

Chimneys with Silent Inverter Motor

Designed to deliver ultra-low noise performance (up to 10dB** lower than conventional chimneys), Crompton chimneys have a powerful inverter motor at the heart of it.

*As per test conducted by German Institute of VDE.
**Noise level measured and tested at ARAI Lab.

Hobs with brass burner

Our hobs are fitted with full brass burners making them suitable for versatile cooking. The innovatively designed digital timer hobs allow you to switch off the hob at pre-set time.

Dishwasher with PureBeam+ Technology

Keep all your utensils 99.99%* bacteria-free and odour-free after every wash with our PureBeam+ technology. High-grade stainless steel in our tub is rust and corrosion free that makes Crompton dishwasher the perfect companion for Indian utensils.

Ovens with steam assisted cooking technology

Steam assisted cooking and 3D heating features of our ovens deliver perfect baking results. What's more, the pyrolytic and steam cleaning features take away the hassle of cleaning the oven.

Microwaves and warmer drawer with full black tempered glass design

Our microwaves and warmer drawer come with full black tempered glass design. With 8 Auto menus and soft touch control our MWO adds a special value to user experience. Accessories like baking pan, grill pan, and grill rack are an extra delight.

Chimneys

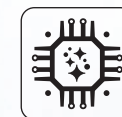

**Crompton Chimneys so silent,
they will leave you speechless.**

Our silent chimneys are powered by advanced inverter motor that offers high suction at reduced noise level. Intelligent in-built sensors enable our chimney to automatically clean itself periodically providing hassle-free operation and making your kitchen a comfortable place while you enjoy the cooking experience.

Silent Inverter Motors:

Designed and manufactured with the trust of Crompton engineering, our inverter motors operate at surprisingly low noise levels (up to 10dB** lower perceivable noise compared to conventional chimneys), offering 9 speed levels with a maximum suction capacity of up to 2000 m3/hr* that make your kitchen a comfortable and pleasurable place to enjoy, as it should be!

Intelli AutoClean:

Crompton's intelligent AutoClean system automatically turns on the Auto Clean Mode after 30 hours of chimney operation. The high-temperature heating element melts the oil and grime which flows down in an oil tray; all you have to do is empty and clean the tray. So, relax and enjoy the cooking while we take care of the cleaning.

Gesture Control:

Crompton's specially designed Gesture Control Function senses hand gestures and uses intelligent motion sensors to activate/deactivate specific functions on your chimney, offering you an experience of touch-free operation.

SmartON:

Crompton's innovative chimneys also include the exclusive SmartON feature. This function has advanced sensors that detect a temperature change once you begin cooking and switch ON the chimney. Even if you forget to turn ON your chimney, you'll have a smoke-free and worry-free cooking experience.

Filterless Technology:

Say no to tedious scrubbing and cleaning of filters. Our modern chimneys incorporate Filterless technology*. Oil and grease released during cooking is gathered in a tray that can be cleaned on a regular basis depending on usage, making chimney maintenance and cleaning a simple and easy process.

Features may vary from model to model. Features and specifications are subject to change without prior notice.

* - Mentioned Suction level in Cubic meter hour (CMH) or m3/hr is measured at the highest operating fan speed on the inlet side of the cooker hood/chimneys

** - Mentioned Noise level is the lowest sound pressure level measured in dB(A) for the lowest operating speed of the cooker hood/chimneys.

Above specifications are measured under standard lab conditions and have tolerance of +/- 10%. Also, these values may vary as per product usage.

***Features may vary from model to model.

GrandArt

Make your kitchen grander with our GrandArt chimneys, which are tastefully crafted to add a touch of beauty to your kitchen. Powered by silent inverter motor, our chimneys feature a large user-friendly touch panel and intuitive features like intelligent Auto Clean and gesture control so you can have complete control over your chimney and an enjoyable cooking experience.

Recirculation Kits

We also have Recirculation Kits that are compatible with our Chimneys. The system enables you make your Chimney ductless, and your kitchens more comfortable without interfering with the aesthetics.

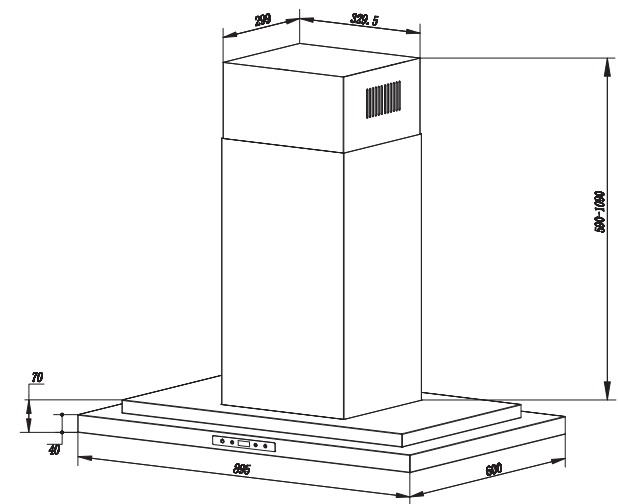

This recirculation kit is placed inside your upper chimney recirculation piece and is designed to direct the filtered air through the side vents, back into your room. This simple addition eliminates the need for bulky ducting pipes allowing for a seamless kitchen interior.

The recirculation kit comprises of a 4-layer filtration system. The smoke is pre-filtered before it passes through the charcoal membrane filter, which extracts and filters the odour, ensuring that the purified air is returned into the kitchen. The charcoal filter layer's high absorption power increases the chimney's efficiency. Additionally, it acts as a filter to prevent greasy chimney walls.

Hobs

Crompton Hobs that value your time.

Put an end to your worries about not turning OFF the hob on time! With our digital timer hob, the pre-set timer gets the job done for you. Our hob has full brass burners, multi-rings, and 3D flame technology, making them suitable for a large variety of cooking, from low to high heat.

Digital timer in wok burner*:

Now, no worries about switching OFF the hob! Get consistent cooking results with our OpTime hobs. Just set the timer and our hob gets the job done for you.

3D Flame Technology:

With our high-efficiency 3D brass burners that ensure equal heat distribution throughout all corners of the vessel, you can cook every dish to perfection in less time. So that when it comes to serving Biryani, you spend less time preparing and more time enjoying it.

Flame Failure Safety Device:

In the event of a spill, our smart sensor enabled hobs automatically turn off the gas supply, ensuring your safety and peace of mind.

High efficiency full Brass Burners*:

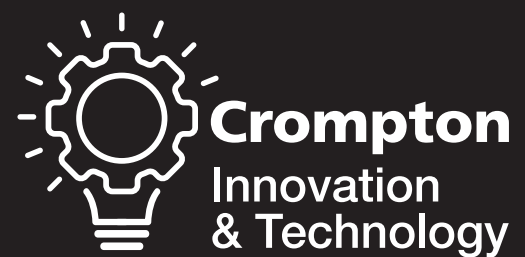

Our hobs include full brass burners for increased efficiency and consistent heat distribution, making them perfect for slow cooking as well. The brass design also ensures a long life and high performance, saving you the trouble of having to replace your burners due to melting.

Brass Burners with multi-ring flame:

Enjoy consistent cooking with our powerful Triple Ring Wok burners, which have three concentric rings of flame for increased strength and better flame dispersion. The outer ring enables high heat cooking, while the mini-ring allows slow cooking or simmering depending on usage, making chimney maintenance and cleaning a simple and easy process.

*Digital timer available in OpTime Series, All OpTime models have Pan support with flame guard
*Full brass burners available only in OpTime

Cast iron pan support with enamel coating:

Our hobs feature pan supports made of robust cast iron with an enamel coating. As a result, they can withstand larger loads without deforming.

Toughened glass with bevelled edges:

The toughened glass of our hob can withstand heavy loads without giving up, and the bevelled edges keep the premiumness intact.

Premium heat resistant metal knobs:

Our hobs come with metal knobs with a superior look and feel that are durable and easy to operate.

Sleek and stylish:

Our SuperSlim hobs are easy to install and come in sleek, modern designs with edges as thin as a notebook, making them one of the most eye-catching kitchen upgrades you can make. Not only that, but you won't have to cut the slab to install the SuperSlim hobs in your kitchen.

Auto-ignition:

Lighters will become a huge no-no with our auto-ignition hobs that ignite on their own.

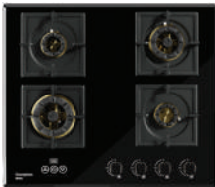

OpTime

Now, no worries about switching OFF the hob! Get consistent cooking results with our OpTime hob. Just set the timer and our hob gets the job done for you.

Built-in Ovens

Built-in Ovens that cook, bake, fry and amaze.

Turn the cook inside you into a Master Chef with our thoughtfully designed Built-in Ovens featuring 3D heating, Steam assisted cooking, Multi-level baking and more. So go ahead and whip up a meal that everyone can relish, whenever you wish.

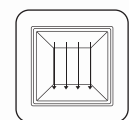

Steam Plus:

Our Steam Plus (steam assisted cooking) feature ensures that you never compromise on deliciousness of your food by adding extra moisture to it. So, your freshly baked bread can taste extra fresh, and your newly roasted meat can be extra juicy on the inside while attaining that perfect crisp on the outside.

3D Heating:

Our built-in ovens come with an additional heating element around the fan that not only helps blow hot air around the food but also helps with multi-rack cooking by maintaining an even flow of the hot air at all levels and at a consistent temperature.

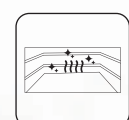

Hot Air Shield:

Our Hot Air Shield technology is uniquely & innovatively designed to prevent users from the hot and wet air that escapes from the oven door, after the cooking is done. By creating a shield-like air stream between oven's control panel and its bottom pane, it keeps the user safe from the hot oven air, at all times.

Pyrolytic Cleaning:

The pyrolytic mode in our ovens helps eliminate the need for any and every kind of additional detergent-based cleaning steps by turning up the temperature to 450 °C, which helps convert the residues left over from roasting, grilling, and baking into a thin layer of ash that can simply be wiped away with a damp cloth.

Steam Cleaning:

Now cleaning Oven's cavity is a hassle-free job! Our built-in Oven comes with Steam Cleaning function that softens up the dried food stains inside the cavity with vapour, ensuring that your oven's cavity stays hygienic and odour-free as ever.

Multi-level Cooking:

Be it a 3-tier cake, or a batch of 60 cupcakes, you can now bake it all at the same time with our improved heat distribution system that delivers hot air to every layer and every corner inside your oven's stainless-steel cavity, evenly, so that cupcakes comes out fluffy and well-baked.

*Features may vary as per model. All features not available in all models.

**Soft Open & Close Doors:**

Slamming Oven doors shut will now be a thing of the past with our dampened hinge doors that enable soft opening and closing, without fail.

**Rotisserie:**

We bring to you a whole host of fanning, grilling and double grilling options for whole chickens and roast with our turnspit feature, that's sure to get you a lot of love at family gatherings and feasts.

**AirFry:**

Air fryer allows us to make crispy foods that taste similar to the deep-fried version but without all of the extra oil. The air fryer contains a fry basket that allows food to be suspended and accessible to heat from all sides—great for making things nice and crispy. However, instead of being placed in hot oil, the food is exposed to very hot, circulating air.

**Sabbath Function:**

When in Sabbath Mode, your oven will disable its automatic shut-off function to stay on longer than 12 hours. This means that the oven will stay in a Bake mode until shut off, which will allow you to use the oven for cooking or warming food.

**Wifi-enabled:**

Now control and monitor your oven remotely using a smartphone and other smart devices. Use features like remote on-off, notifications, selection of cooking functions and some safety features as well.

*Features may vary as per model. All features not available in all models.

Built-in Microwave Ovens

Show off your cooking skills, and see some of ours too.

Cooking healthy, delicious food will now be a breeze with our built-in microwave ovens. Designed with user-friendly functions and time-saving technologies, these microwave ovens are made to help you whip up yummy elaborate meals in lesser time so you can save more of it for yourself.

Convection cooking:
Designed with an additional element around the convection fan, our ovens are built to provide additional heat for convection-style cooking, so your meals never lose the warmth that they are made with.

Auto menu:
Whip up any dish you want with our microwave ovens that are designed to help you excel at cooking with the 8 auto menus, making them smarter kitchen assistants who ensure smoother cooking experiences for you.

Stainless steel cavity:
With advanced structural design and exquisite craftsmanship, we ensure that there is zero space for accumulation of oil stains and food residues.

Defrost :
Defrost your cream filled products, saved pizza slices, etc. with our heatless defrost feature that circulates air at room temperature to enable quicker thawing of food. So you can dig into your favourite dishes without having to wait for too long.

30-second express timer:
Get your nourishment on the go with our 30-second express timer that lets you heat food faster, so you can eat healthier, every day.

Dishwashers

Perfect companion for Indian utensils.

Our dishwashers feature PureBeam+ technology and steam wash to easily remove oil, grease, and stubborn stains from utensils while saving water. Crompton Dishwashers are therefore built for multi-directional targeted cleaning and turbo drying with pin-point accuracy, resulting in 99.99%* germ-free utensils.

*Tested and approved by International German Test institute of VDE.

Crompton Innovation & Technology

PureBeam+ Technology:

Crompton dishwashers use a combination of UV Beam and Ionizer technology to ensure bacteria-free dishes. The UV beam eliminates post-wash residual germs, while the ionizer's deodorising effect keeps your dishes smelling clean and fresh.

HydroPower Inverter Motor:

HydroPower wash mode is designed to give greater performance with reduced noise (44dB*) thanks to inverter motor technology. It introduces new and diverse ways to wash dishes by utilising variable pump pressure. As a result, the wash quality improves every time.

Intelligent Turbo Drying:

Crompton dishwashers have a Turbo drying mechanism that eliminates the need to wipe the dishes after washing. The steam is completely drawn out of the dishwasher with the help of an additional fan support mechanism, resulting in completely dry dishes with no water droplets.

Hygiene wash:

Our Hygiene wash feature helps you eliminate 99.99%* of all bacteria that is tested and approved by International German Test Institute of VDE, by heating water up to 70°C, before using it for the purpose of cleaning dishes ensuring highest level of hygiene during every wash.

Steam Wash:

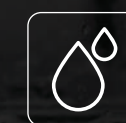

Water is heated up to 70°C to create steam inside and softens up the crusts and leftovers from pots, pans, kadais to fragile glasses. That's not all, the dishes are gently sanitized at the same time. The directly applied steam ensures perfect hygiene and gentle cleaning for dishes. It can also be combined with Extra Dry function for perfect drying results.

Stainless Steel Inner body:

Our dishwashers are created with Rust & Corrosion free, high grade Stainless Steel inner body for hygienic wash and longer life.

*Tested and approved by International German Test Institute of VDE

**Saves water up to 85%*:**

Did you know that washing utensils by hand could use up to 60 litres of water? With Crompton Dishwashers, there's no need to be worried about wasting water. Our dishwashers consume only 9 ltrs* of water against regular handwash that consumes 60 ltrs of water for same load.

**QuickClean Function:**

Our dishwashers deliver A-class washing results with an advanced washing cycle in only 50 minutes, saving you time and hassle from having to wait longer for ideal cleaning results.

**Dual Pro Wash:**

Customised Dual Pro wash programme allows for one-wash cleaning at two different water pressures to remove oil and stain marks from utensils such as Kadai, Pressure Cooker, Serving Pot, Saucepan, and others, resulting in completely clean utensils, free of foul odours and stains. It can also be used in combination with the Extra Dry feature to provide optimal drying results.

**Smart wash:**

Our dishwashers come with Smart sensors that intelligently analyse the degree of turbidity in the water and adjust the water, detergent, and rinse aid consumption as needed.

**Extra Fast Option:**

Reduces programme duration by up to 50% while increasing water temperature and pressure without compromising washing performance, resulting in 3x faster rinsing with optimal cleaning and drying.

**Flexi Basket:**

The multi-stage rack support can be adjusted to fit taller plates in the middle rack while still leaving room for pots and pans below. Height can be adjusted both with and without a load.

*Available in selected models only

GrandArt

Built-in dishwashers by Crompton are designed to blend seamlessly into your new or existing kitchen. Leave the cleaning to the dishwasher after a hearty meal! Powered by UV Beam and Ionizer technology, this dishwasher range provides 99.99%* bacteria and odour-free utensils. The dishwashers in this range have the largest capacity – fits a whole load of dishes, making it ideal for a household of up to seven people.

*Tested and approved by International German Test institute of VDE.
