Description	Hidden Sliding Fitting With Aluminum Track 1.2Mtr.
MRP	30000/- Per Set.

New

Fully open the door

1.The Red rectangle is door hole.
2.Door width=the width of door hole + 267mm (width of wheel)
Door height=the height of door hole +70mm

Not Fully open the door

1.The Red rectangle is door hole.
2.Door width=the width of door hole + 135mm (width of wheel)
Door height=the height of door hole +70mm

Not Fully open the door

1.The Red rectangle is door hole.
2.Door width=the width of door hole + 220mm (width of wheel)
Door height=the height of door hole +70mm

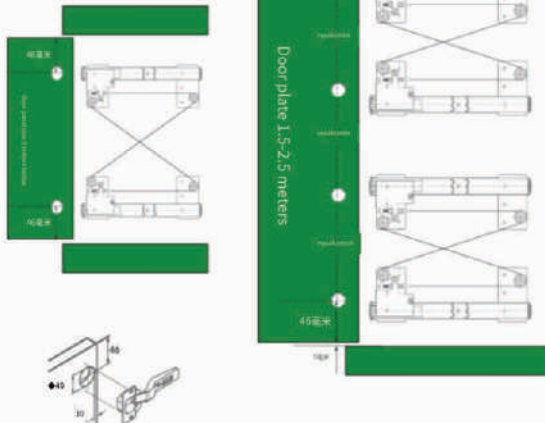

Item Code	SSDF 1183
Description	Pocket Door Sliding Fitting, (One Door Kit), Available Depth Size : 450mm., 500mm., & 550mm.
MRP & Size	450mm. 12250/- Per Set. 500mm. 13000/- Per Set. 550mm. 14000/- Per Set.

Installation precautions

Suitable for door height 1.2-2.5m, minimum cabinet depth 400mm-700mm.
The width of the door panel is 300mm-500mm, the thickness of the door panel is 18-27mm.
The maximum gate weighs 10-18kg.
If you want to install a partition in the middle, please be careful to leave enough space.

Door and cabinet requirements

1. The hinge hole is not allowed to be too close to the edge of the cabinet.
2. Drill the hinge holes according to the drawing requirements.
3. A built-in door needs to be made.

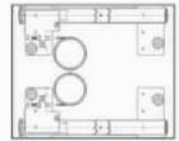

Standard 40mm medium-bend damping hinge (18mm-27mm thickness of door plate)

Installation guide

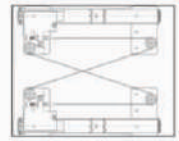

(1) Install the slide rail

1. When installing the slide rail, the distance between the vertical line of the slide rail and the edge of the cabinet is the thickness of the cabinet door panel. If the door panel is 20mm, the distance is 20mm.
2. Insert the slide rail into the hole and bottom of the cabinet. (See page 1 for the distance between the holes.)

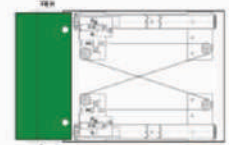

(2) Installing steel rope

1. Install the guide rails according to (1).
2. Put the upper rope of the guide rail, then pull the rope up to the roller at the highest point of the cabinet, and fix the rope to the screw.
3. Adjust the tightness of the upper rope and tighten the screws.
4. Repeat the above steps for the other slide rail.

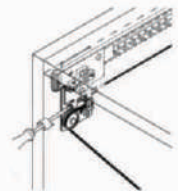

(3) Install hinges and doors

1. Use M4*5mm to fix door panels and side panels.
2. Put the hinge into the hole and fix the screws.
3. Hinges are fixed on the slide plate and door plate.
4. Close the door to check the clearance. If you need to adjust it, please refer to (5).

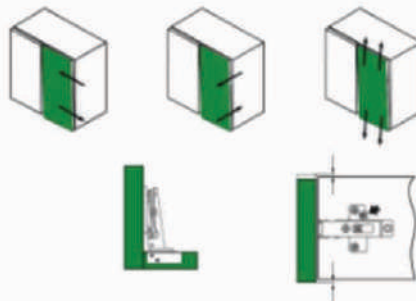

(4) Adjust the door panel

If the door swings slightly while ensuring that the weight of the door does not exceed 18kg, it can be done by adjusting the screws on the dual rope, which is at its best to maintain a slight tension.

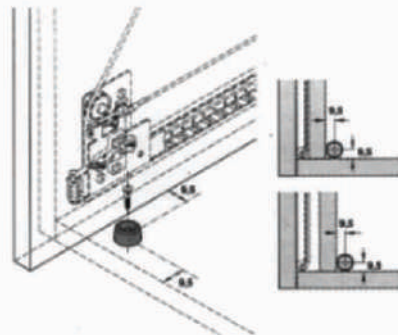

(5) Adjust the hinge

1. left and right adjustment: -0.5mm/5.5mm
2. Front and Rear adjustment: 2.8mm
3. Adjust up and down: -1.5mm/1.5mm

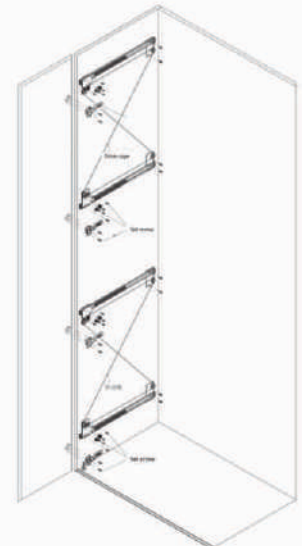

(6) Install the positioning wheel

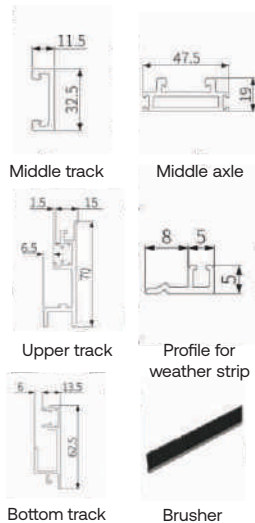

1. Fix the positioning wheel on the bottom plate and top plate of the cabinet as shown in the figure.

Application example

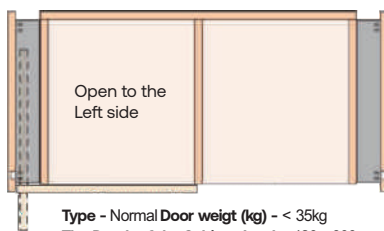

Item Code	SSDF 1184 - L
Description	Pocket Door Sliding Fitting, With Soft Close, for Left (One Door Kit)
MRP	103000/- Per Set.

**Product Features:**

- The door panel can be hid inside the cabinet and doesn't occupy the space outside the cabinet. Overall surface is in the same level when the door closes. It is elegant and noble.
- It is smooth to push and pull. No shake.
- Easy to install and adjust. No need to tilt.

Technical Points:

- **Application:** Wooden door
- **Door Weight:** Single door $\leq 35\text{kg}$
- **The depth of the cabinet:** 420-600mm
- **The height of the cabinet:** 1800-2850mm
- **Door thickness:** 18-25mm

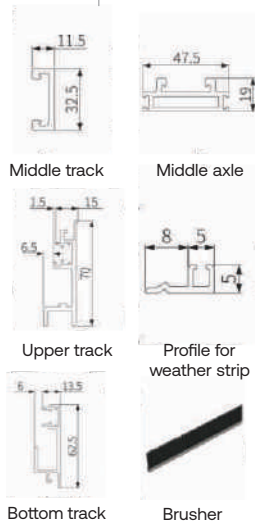

Type - Normal Door weight (kg) - < 35kg
The Depth of the Cabinet (mm) - 420 - 600
