SPECIAL FEATURE

RQ Protect Medical Grade Surface Finish

Stain Resistance:

The surface treatment helps to make sheet vinyl flooring more resistant to stains, spills, and other liquids. This can be especially beneficial in areas like kitchens, bathrooms, and laundry rooms, where spills are more likely to occur.

Improved Appearance:

The surface treatment enhances the appearance of sheet vinyl flooring by creating a more consistent and uniform finish. This helps to make the flooring look more aesthetically pleasing and adds to the overall design of a space.

Enhanced Scratch Resistance:

RQ Protect significantly improves the scratch resistance of sheet vinyl flooring, making it more resistant to damage from everyday wear and tear. This is particularly important in high-traffic areas like commercial spaces and homes with pets or children.

Easy To Clean:

RQ Protect makes sheet vinyl flooring easier to clean, requiring less time and effort to maintain. Dirt, dust, and other debris can be easily wiped away without leaving any residue on the surface, this increases the life of the floor.

Cost-Effective:

At no additional cost to the initial purchase of sheet vinyl flooring, it is a safe guard for the long run. By increasing the durability and longevity of the flooring, it can save expenses on repairs and replacement in the future.
