SALICE

Features of the 2201 unified rail

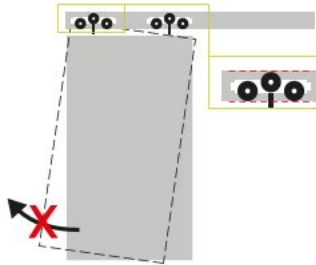

Rail Villes2000

kg From 10 to 170 kg

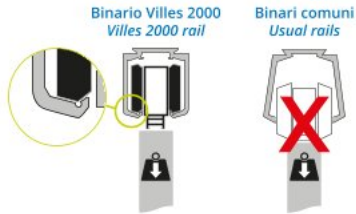

Aluminum rail compatible with all 2200 series trolleys.

Anti-pitch device

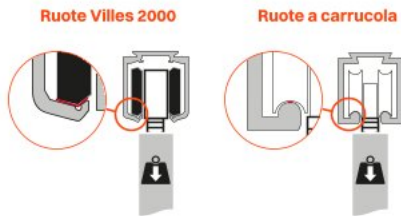

The 6 and 8-wheel trolleys glide inside the rail with extreme precision, ensuring maximum door stability.

Anti-spreading profile

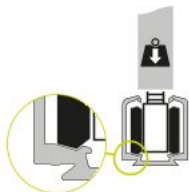

The exclusive profiling of the Villes2000 rail and wheels prevents spreading and trolley derailment

Wheel profiling

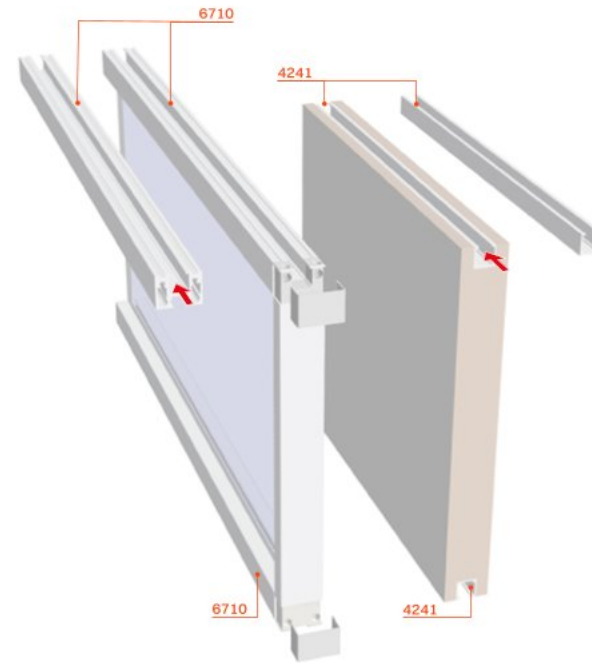

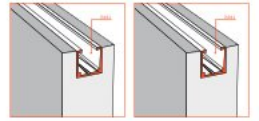

The exclusive shape of Villes2000 wheels ensures a wide contact surface with the rail, guaranteeing they remain non-deformable

Reversible rail

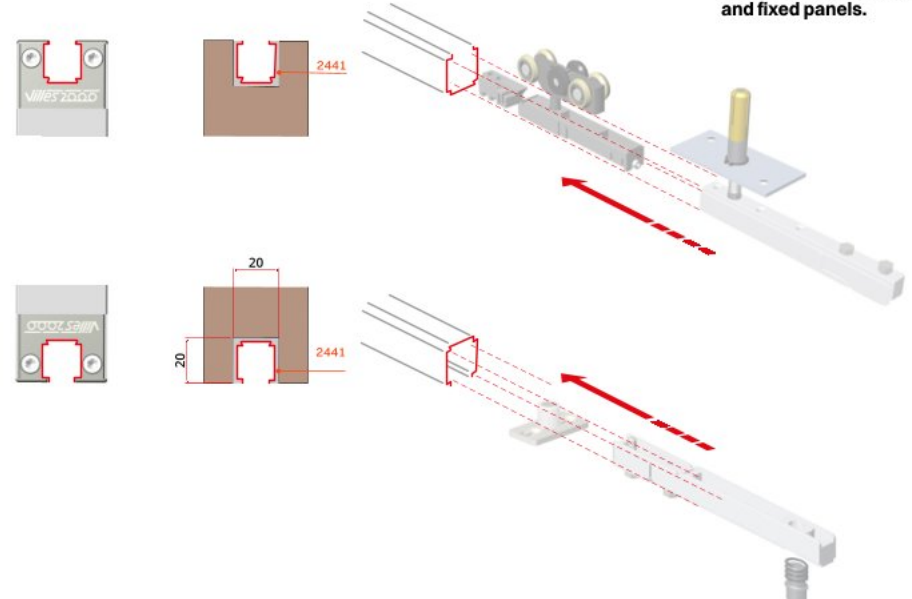

Thanks to the symmetrical internal profiling, 2200 Series rails can be inverted and used as floor-mounted guides.

Unified door preparation

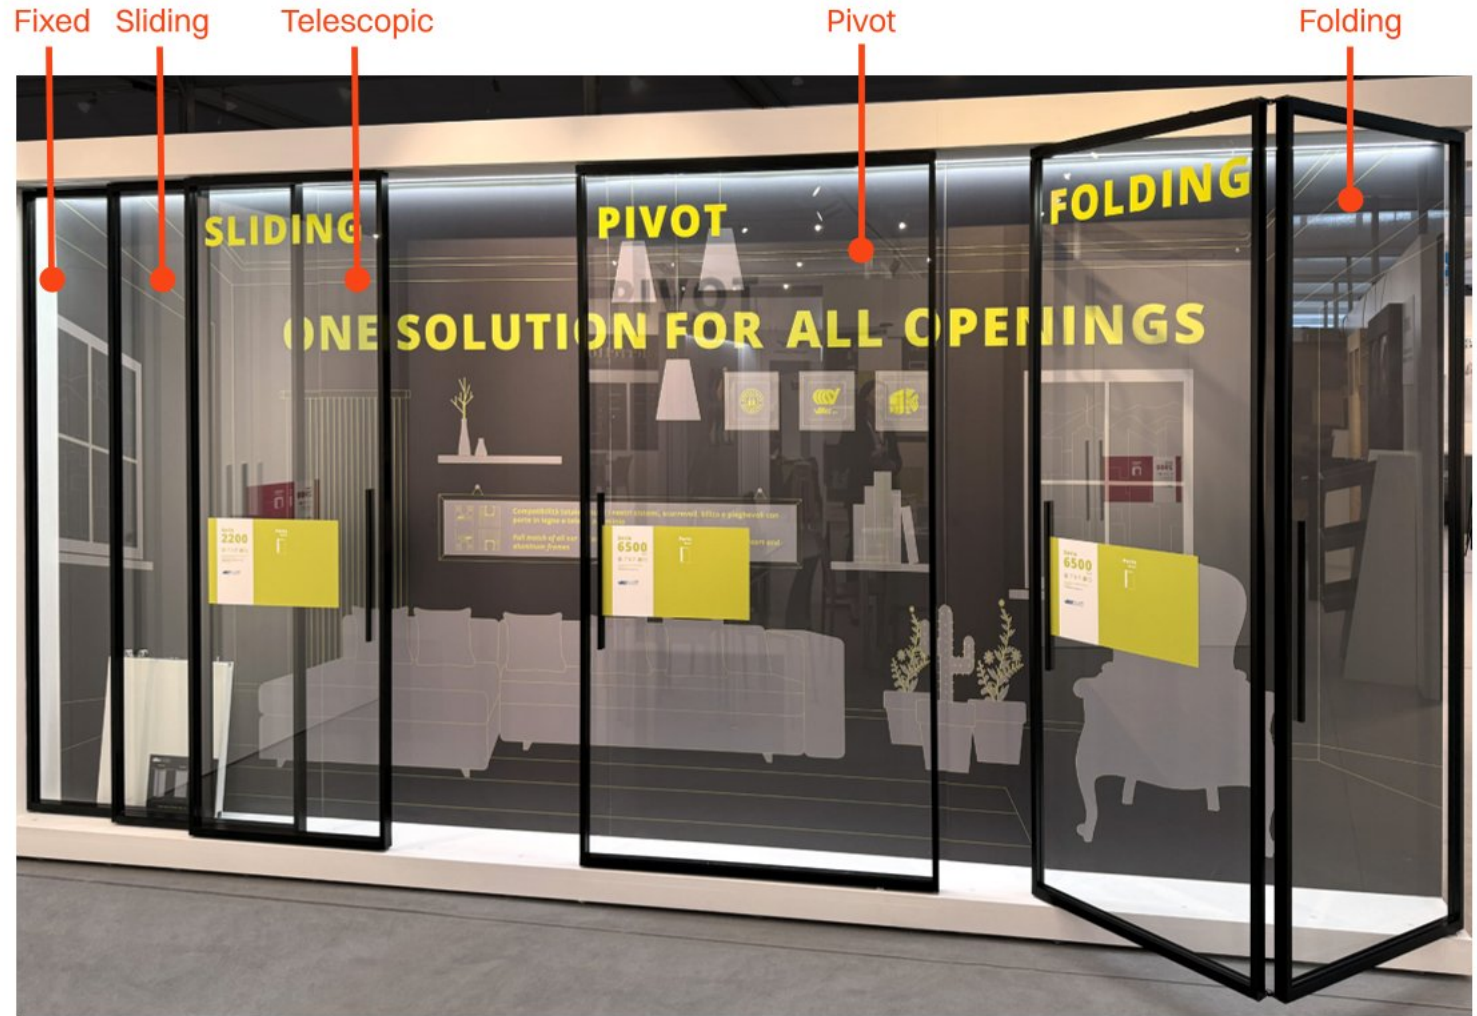

Thanks to this preparation, it is possible to create framed doors suitable for all types of applications: single or multi-leaf sliding and telescopic doors, folding doors with two or more leaves, pivot doors, and fixed panels.

SALICE

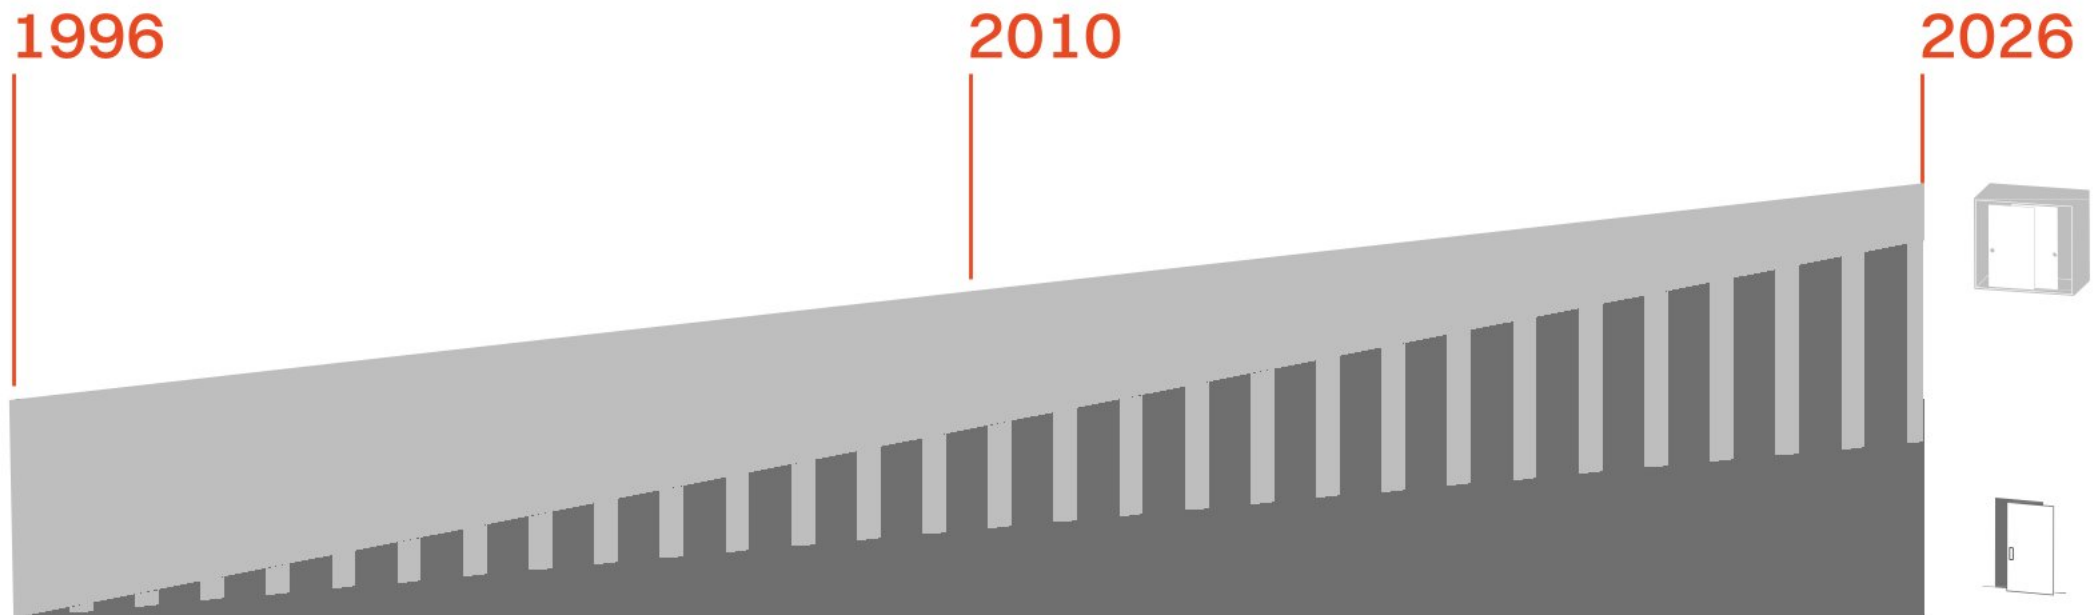

Crossover modularity

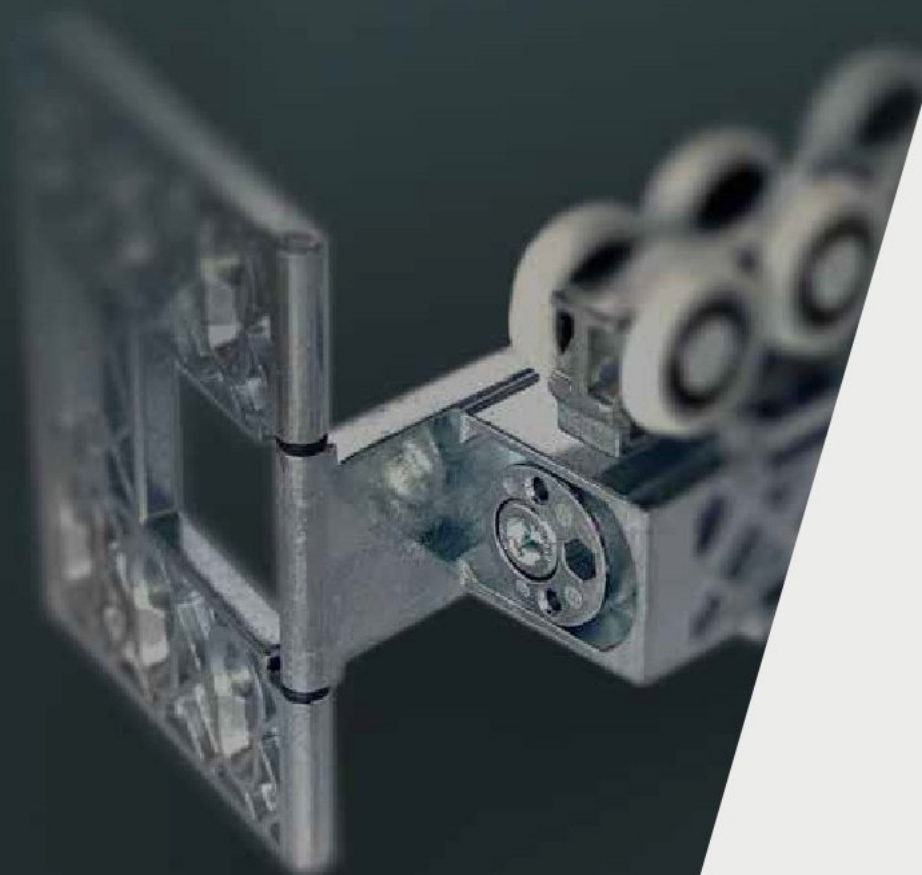

A single integrated system for all needs

Crossover of our business

The crossover area between doors and furniture is growing

Our products

Sliding doors system

Serie 2200 | 2100 | 6100 | 6200

SALICE

Serie 2200

A modular sliding system for wooden, glass, or aluminum doors.
Designed as an integrated platform to cover multiple applications with standardized components.

Key Features

- Load capacity up to ~170 kg (depending on configuration)
- Compatible with multiple movement types (sliding, telescopic, synchronized)
- Soft-close with Easy-on system
- Interchangeable modular components
- Simple and precise installation

Key Customer Benefits

- One system for multiple application
- Customize your system with a full range of compatible accessories
- A full range to cover different customers' projects needs
- Suitable for OEM standardization
- Different application of the system allow less SKU management and inventory reduction

Serie 2200 accessories

Serie 6700

Modular system for aluminium frame doors

Serie 2700

Synchronized connection system for two sliding doors or shutters

Serie 2400

"Slide and fold" system for small spaces

Serie 5000

Automation for internal sliding doors

Serie 5500

Automatic re-closing system for sliding doors inside and outside the wall

Serie 5600

Systems and accessories for pocket sliding doors

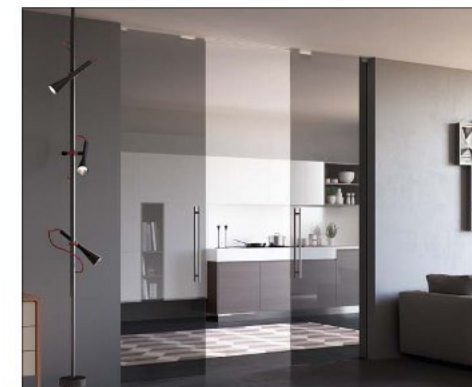

Serie 5700

Synchronized telescopic system suitable for 2 sliding doors plus a possible fixed panel

Serie 5800

Sliding system for glass doors

Serie 2100 / Serie 6100

A compact sliding system for furniture applications, ideal for serial production and high-volume projects.

Key Features

- Easy installation
- Good load capacity
- Soft close available (for 6100 only)
- Robust and reliable structure
- Optimized for industrial production

Key Customer Benefits

- Value for money product
- Best seller across the Villes range
- Sliding system applicable both for doors and furniture (ideal for distributors)
- Long lasting product quality

Serie 2100 accessories

Serie 3200

Slyding system with lower carriages
with doorstop and foldaway

Serie 6200

Invisible sliding system both for wooden and glass design doors.

Key Features

- Minimal design with no visible supports
- It can be installed on non-structural walls
- Smooth and silent movement
- Double soft close available
- Adjustability with the door installed

Key Customer Benefits

- Invisible & elegant design
- Cross-selling opportunity with door customers
- Premium quality components
- Technical solution with emotional visual impact

Folding & Pivot systems

Serie 6500 | 2900

SALICE

Serie 6500

A pivot and folding door system designed for large openings and advanced architectural solutions.

Key Features

- Modular door system
- Designed for large and heavy doors, both in wood or aluminium
- Reversible installation
- Tensioning system to prevent wooden door deformation
- Low rotation friction

Key Customer Benefits

- Premium aesthetic with hidden components
- Suitable both for residential and contract projects
- High weight capacity
- Easy installation without strong predisposition

Serie 6500 accessories

Serie 2500

Folding doors equipment, divided in two different parts

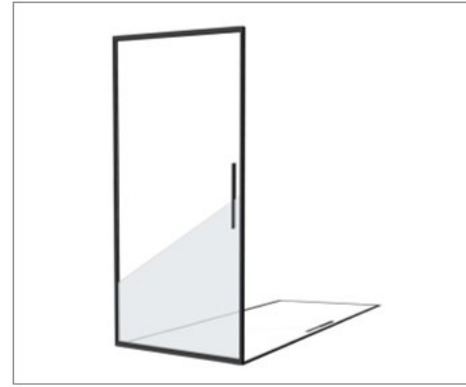

Serie 3100

Folding doors equipment divided in two equal parts

Serie 6700

Modular system for aluminium frame doors

Serie 2900

A folding system for furniture that allows full cabinet opening with minimal space occupation.

Key Features

- 2 or multi-panel configurations
- Space optimization
- Stable movement with high load capacity
- Intuitive installation
- Ideal for niches and wardrobes

Key Customer Benefits

- Perfect for compact living spaces
- Differentiated alternative to sliding systems
- Higher perceived value for end customers
- Ideal for modern, minimalist projects
