

# PVD Matt Gold

## The Sun-Kissed Silhouette Refined. Timeless. Absolute.

Our Matt Gold finish reimagines the classic opulence of gold for the 21st-century home. It offers the warmth of a sunset without the glare of traditional plating.

### The Aesthetic:

Pairs beautifully with deep jewel tones (Emerald, Navy) or natural textures like white marble and light oak.

### The Vibe:

It brings a "glow-from-within" quality to our Aura and Artic collections, making it the perfect choice for spaces that aim for a "Quiet Luxury" aesthetic.

### The Touch:

A smooth, satin-like surface that resists fingerprints and maintains its pristine look through daily use.

# PVD Matt Rose Gold

## Modern Romance, Sculpted in Metal Soft. Sophisticated. Avant-Garde.

Matt Rose Gold is the ultimate statement for those seeking a touch of warmth and personality. By removing the high-gloss "bling," we have revealed the romantic, copper-hued soul of Rose Gold.

### The Aesthetic:

Complements contemporary "blush" palettes, grey concretes, and dark walnut woods.

### The Vibe:

It offers a delicate balance between feminine elegance and masculine structural design. It is particularly striking on our geometric Artic Collection handles.

### The Character:

A unique, contemporary finish that evolves with the light throughout the day.

# Engineering Behind the Elegance

## PVD Mastery: Beauty that Endures

At Atcraft, a finish is only as good as its durability. Our Matt Gold and Matt Rose Gold are achieved through Advanced PVD (Physical Vapor Deposition) technology.

### Why Atcraft PVD Matt?

#### Uniformity:

Our vacuum-deposition process ensures a perfectly consistent matt texture across the entire surface of the handle—even on intricate curves.

#### Harder than Steel:

The PVD layer is molecularly bonded to the pure brass base, making it incredibly resistant to scratches, salt-air corrosion, and daily wear.

#### Anti-Fingerprint Technology:

The specialized matt texture naturally diffuses the oils from your hands, ensuring your hardware looks untouched even in high-traffic areas.
