

WHY US

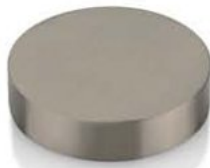

Over forty two years of history are a heritage of precious craftsmanship, to which are added dedication, manual skill and industrial technology to push the company to produce new models constantly, cutting edge technology with innovative and sustainable finishes.

The continuous research activity made by the Research and Development Centre is aimed to combine an uncompromised form and function, placing Akanksha hardware among the leading companies in the sector, both nationally and internationally.

OUR STORY

Every company originates from a dream and the founder's dream of Akanksha hardware had the colour of gold: brass. It was the year 1980. Passion for beauty and ingenuity generates innovation in which Akanksha hardware has always been recognised.

Throughout the forty plus years of its manufacturing history, Akanksha hardware has earned distinction for the quality of its products and the reputation of its brand.

From generation to generation, the Akanksha Hardware family has passed down the attention for detail, the quest for innovation, and above all, a passion for working to high standards.
